| | |
|--------------------------------|---|
| Programming Languages : | C++, JavaScript, C. |
| Web Development : | HTML, CSS, NodeJS, MongoDB. |
| Other Skills : | Data Structures and Algorithm, Object Oriented Programming, Operating System. |
| Other Tools : | Github, Postman |

PROJECTS

ForecastRight. Created a dynamic web application with JavaScript, offering users instant access to weather information for any location. Elevated user experience with real-time updates and interactive features, enhancing the accessibility and functionality of the platform for seamless weather tracking. ([Try it here](#)), ([GitHub](#))

Url Shortener. The Link Shortener web app condenses lengthy URLs into brief, user-friendly links, simplifying web addresses for enhanced convenience.

During our college festival, we've implemented short URLs for ease of sharing on posters and flyers, enhancing accessibility and convenience for attendees. ([Try it here](#)), ([GitHub](#))
